To a prospective student

Information Technology Management

Nearly every organization in almost every industry needs qualified IT managers. Today's employers are looking for skilled information technology professionals who possess project management and problem-solving abilities to drive change and keep organizations running smoothly.

Master in Information Technology Management

- ✓ 2 - year program
- ✓ Full program in English
- ✓ Degree in IT-Management

Why our program?

IT-management deals with the design, development, operation and use of program products and services to help increase efficiency and deliver value to an organization. IT-management management is closely related to other disciplines such as business intelligence and analytics, user experience design (UXD), innovation management and strategic management.

Anna Yu. Fedotova, Candidate of Economic Sciences, Director of the Program

We don't evaluate your application based solely on your GPA and test scores. Mostly we take into consideration your experience in information technologies, software development and strengths demonstrated in the sum of your application materials.

Admission requirements

The Admissions Committee will review all of the application materials, while focusing on the academic credentials. We also consider the trends on the transcript and look favorably on those have challenged themselves with their curriculum choices.

Work paths and future careers

Our graduates will succeed in, but not limited to, IT-Management and IT-Business analytics.

Specializations of Masters in IT-management include IT - project management, data analytics, HR management, software development, information management, etc. The courses typically combine IT knowledge with business management skills.

Discover the value of ITM program

It is important to understand the whole picture of the cost of your education: IT-managers as tutors, Modern IT infrastructure, Other Fees.
